# Installation Guide & Walkthrough for

## Magehouse AJAX Layered Navigation & Toolbar with Price Slider

# Installation

This guide will help you configuring the general option for Price slider.

1) Install [Magento](#)

　　　You can use any version of magento > 1.5.

2) Install this plugin

　　　- Please note: Any other extension must not override

　　　Mage_catalog_Model_Catalog_Layer

　　　Magehouse_Slider_Model_Catalogsearch_Layer

　　　Magehouse_Slider_Block_Catalog_Layer_Filter_Price

　　　Installation:

- Download and install the tarball package from the Downloads page on GitHub (note that this is not the "Download as tar.gz" button) and install through Magento Connect Downloader or Magento's *mage* command.

- Install through Magento Connect with the extension key:

- http://connect20.magentocommerce.com/community/Magehouse_Slider

- Install with modman. You would just need to use: modman clone https://github.com/mrugeshrocks/Magehouse_PriceSlider2.2.0.git

　　　**Note** If you install with modman you should also set

　　　System > Configuration > Developer > Template Settings > Allow Symlinks to "Yes".

3) Clear the *Config*, *Layout*, and *Block HTML* caches and disable the *Full Page Cache* cache (if it is available and enabled) in System > Cache Management, then logout and log back in.

4) Installation done! Let's head over to the configuration.

# Configuration

Step1 :

- Login to the magento panel and browse to  System > Configuration > Magehouse Extensions > Price slider
- Here will be basic Configuration for the price slider

| Option | Description |
|---|---|
| **Enable Price slider** | This should be set to yes to use the price slider |
| **Include jQuery** | If you have already included jQuery in the system, set this to "NO". Please ensure jQuery is loaded on the top before the price slider JS. |
| **Include jQuery UI** | If you have already included jQuery UI in the system, set this to "NO". Please ensure jQuery UI is loaded before jQuery. |

Step 2)

Clear the cache / flush the javascript cache and varnish cache if you have installed varnish.

Now the slider should come up on frontend.

If the slider donot come up please check the following:

- Is there any other module that overrides these classes
    - o  Mage_catalog_Model_Catalog_Layer
    - o  Magehouse_Slider_Model_Catalogsearch_Layer
    - o  Magehouse_Slider_Block_Catalog_Layer_Filter_Price
- Is cache cleared / check the file permissions?
- Are javascripts getting loaded on the page.?

Still facing issue? Please write to us at **mrugesh.rocks@gmail.com** with the issue and URI of your website. **We will try best to help you use price slider.**

| Option | Description |
|---|---|
| **Enable AJAX for layered navigation?** | Set this to yes for using AJAX for the entire layered Navigation |
| **Enable AJAX only for Price Slider?** | This is an exclusive option to use AJAX only for price slider. |
| **Enable AJAX for product Toolbar?** | This option if set to "yes" will transform the toolbar to AJAX |
| **After Ajax Call Back JavaScript** | This option gives the power to specify any JS to be called after the AJAX call |

# Theming The Slider

## Price Slider Configuration

| | | |
